

## Why Am I the Size that I Am?

Do you want to have a shot at winning the most amazing prize? When I say amazing I mean something that will make you feel incredibly good for infinity and beyond! All you have to do is answer the question correctly and you could be the winner!

Get comfy, you need to chill and think a little.....

Imagine in front of you is a magic lever. You can turn it to the right. You can turn it to the left.

Like I said it's magic. (It's also imaginary so you'll have to pretend 😊).

The lever has two notches to the left and two notches to the right.

Go ahead (in your imagination), move the lever to the **right**, to the **first** notch.

**Wow.** Instantly everything around you has grown in size !!!

In fact everything has grown **10** times **bigger!** Everything! Every house, tree, cat, river, country, planet and universe. Even the smallest particle within an atom has grown 10 times **bigger!** And you and me. Everything is 10 times **bigger!**

Well that's cool. So tell me, how different does everything look to you now?

- A It looks weird I want to go home.
- B everything looks 10 times **bigger!**
- C everything looks exactly the same as before!

**Only keep reading if you chose answer C**

You have passed the first test!

Go ahead, now move the lever again, this time to the **second right** notch.

**Wow**. Instantly everything around you has grown in size again!

In fact everything has grown **100** times **bigger!** Everything! Every house, tree, cat, river, country, planet and universe. Even the smallest particle within an atom has grown **100** times **bigger!** And you and me. Everything is 100 times **bigger!**

Well that's really **really** cool. So tell me, how different does everything look to you now?

- A It feels unforgettable - like being on a rollercoaster.
- B everything looks 100 times **bigger!**
- C everything looks exactly the same as before!

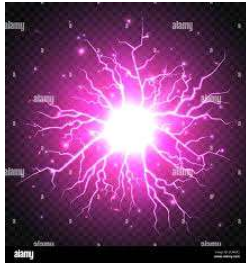

**Only keep reading if you chose answer C**

You have passed the second test!

Go ahead, move the lever back to the centre.

**Then** move the lever to the **left**, to the **1st** notch.

**Wow.** Instantly everything around you has got smaller in size!. In fact everything has got **10** times smaller!. Everything! Every house, tree, cat, river, country, planet and universe. Even the smallest particle within an atom has grown 10 times smaller! And you and me. Everything is 10 times smaller!

Well that's really **really really** cool. So tell me, how different does everything look to you now?

- A It looks like a beautiful day outside and im bored of this quiz
- B everything looks 10 times smaller!
- C everything looks exactly the same as before!

**Only keep reading if you chose answer C**

You have passed the third test! You are so smart! Many don't make it this far.

Go ahead, move the lever to the left, this time to the **second** notch.

**Wow.** Instantly everything around you has got smaller in size! In fact everything has got **100** times smaller! Everything! Every house, tree, cat, river, country, planet and universe. Even the smallest particle within an atom has grown 100 times smaller! And you and me. Everything is 100 times smaller!

Well that's really **really really really** cool. So tell me, how different does everything look to you now?

- A Everything looks upside down
- B everything looks 100 times smaller!
- C everything looks exactly the same as before!

**Only keep reading if you chose answer C**

You have passed the fourth test! Congratulations! ! !

There is just one question to go - and you could win the **amazing** prize !

So we have learned

- if **everything** is made bigger (including us) then everything still looks the same. Even if we made everything 1 million times bigger. Or 10 million times bigger. Everything would still look the same.

AND

- if **everything** is made smaller (including us) then (ALSO) everything still looks the same. Even if we made everything 1 billion times smaller. Or 10 billion times smaller. Everything still looks the same.

So to have a chance at winning the amazing prize all you need to do is listen to this song

Why am I the Size that I Am ? (Electrostar2045 <https://electrostar.org.uk/why-am-i/> )

and send your answer to the question to - [purpledome17@yahoo.com](mailto:purpledome17@yahoo.com)

Competition close December 2046
